01

Your Career Profile

EXECUTIVE SUMMARY

Sara, your profile shines with a remarkable blend of analytical prowess, leadership drive, and structured thinking, revealed by your top Investigative, Enterprising, and Conventional scores. Your deep-seated need for both security and freedom, coupled with your strategic strength, positions you perfectly to make a significant impact in your chosen field. You are poised to not only solve complex problems but also lead initiatives that shape the future, especially within the dynamic technology sector you're interested in.

FULL RIASEC SCORE OVERVIEW

02

Career Personality

The Strategic Architect of Innovation

This combination suggests you are someone who thrives on understanding complex systems, leading projects with clear objectives, and ensuring efficiency. You are driven to innovate and implement solutions with precision and foresight.

PRIMARY TYPE

Investigative — The Analyst

Curious · Logical · Research-Driven

100

100

Your top score in Investigative (100/100) highlights a powerful intellectual curiosity and a drive to delve deep into understanding complex information and systems. You possess a keen analytical mind, preferring to observe, learn, and solve problems through thorough research and critical thinking. This makes you exceptionally well-suited for roles like Cybersecurity Analyst or Product Manager, where dissecting data and understanding underlying principles are crucial for success.

SECONDARY TYPE

Enterprising — The Leader

Ambitious · Persuasive · Results-Oriented

100

100

Simultaneously, your equally strong Enterprising score (100/100) reveals a natural inclination for leadership, persuasion, and initiative. You are not just content with understanding; you are driven to take action, influence outcomes, and lead ventures, making roles such as IT Project Manager or Tech Entrepreneur a natural fit for your ambition.

TERTIARY TYPE

Conventional — The Organizer

Detail-Oriented · Structured · Reliable

100

100

Your high Conventional score (100/100) complements your other strengths by indicating a preference for organization, precision, and efficiency. You excel at creating structured environments and ensuring that processes are followed, bringing invaluable order to complex projects, especially in fields like IT Project Management.

03

Personality Traits

Your Big Five profile paints a picture of a highly engaged, organized, and socially adept individual. You are exceptionally well-equipped to navigate complex professional environments, blending intellectual curiosity with strong interpersonal skills and unwavering dedication.

Openness to Experience

HIGH

100

100

You demonstrate an exceptional level of intellectual curiosity and a profound willingness to explore new ideas and experiences. This high openness means you're naturally drawn to innovation and comfortable with change, which is a significant asset in fast-evolving sectors like technology.

Conscientiousness

HIGH

100

100

Your perfect score in conscientiousness shows you are incredibly organized, disciplined, and goal-oriented. You approach tasks with meticulous planning and dedication, ensuring that projects are completed to the highest standard.

Extraversion

HIGH

100

100

With a high extraversion score, you are likely energized by social interaction and thrive in collaborative settings. You enjoy engaging with others, expressing your ideas, and taking an active role in group dynamics.

Agreeableness

HIGH

100

100

Your high agreeableness score indicates a cooperative and empathetic nature, making you an excellent team player who values harmony. You are skilled at building rapport and fostering positive relationships, which will serve you well in any leadership or team-based role.

Emotional Stability

LOW

0

Your low emotional stability score suggests you might experience a wider range of emotions and could find certain situations more stressful. Developing strategies for managing stress and practicing self-care will be important for your long-term well-being and career sustainability.

04

Core Values

Your core values of Security, Freedom, and Impact reveal a powerful drive for a career that offers both stability and autonomy, while allowing you to make a meaningful difference. You seek roles where you can contribute substantially while maintaining control over your professional journey and future.

#1

Security

Stability, safety, and predictability

 100

This top score emphasizes your profound need for stability, predictability, and a sense of safety in your professional life. You will thrive in environments that offer clear career progression, robust systems, and a reliable foundation, which many established technology companies can provide.

#2

Freedom

Autonomy, independence, and self-direction

 100

Equally important is your desire for autonomy and the ability to make your own decisions and carve your own path. This value suggests you will seek roles that offer intellectual independence, flexible working arrangements, or even entrepreneurial opportunities like becoming a Tech Entrepreneur or Startup Founder.

#3

Impact

Making a meaningful difference in others' lives

 100

You are deeply motivated to make a tangible difference and leave a positive mark through your work. This means you'll be most fulfilled in roles where your efforts contribute to significant outcomes, whether that's leading a groundbreaking IT Project or solving critical cybersecurity challenges.

05

Strengths Profile

Your top strengths of Strategic, Leadership, and Relationships form a potent combination, indicating you are a visionary who can inspire and guide others while building strong connections. You naturally think ahead, mobilize teams effectively, and foster collaboration to achieve ambitious goals.

Strategic

Seeing patterns, planning ahead, solving complex problems

100

100

You possess an innate ability to see the bigger picture, anticipate challenges, and formulate long-term plans to achieve desired outcomes. This strength means you excel at thinking several steps ahead, a critical skill for roles like Product Manager or a Venture Capitalist assessing future trends.

Development tip: Practice scenario planning for complex projects, considering multiple potential futures and their implications.

Leadership

Inspiring, directing, and developing others

100

100

You naturally inspire and guide others, taking charge with confidence and motivating teams towards shared objectives. Your leadership prowess will be invaluable in roles such as IT Project Manager or Startup Founder, where directing and empowering others is key.

Development tip: Seek opportunities to lead student groups or volunteer projects, even on a small scale, to hone your ability to delegate and mentor.

Relationships

Creating and maintaining meaningful connections

100

100

You have an exceptional talent for building and nurturing strong connections with people, understanding their needs, and fostering collaboration. This strength makes you highly effective in roles requiring stakeholder management and team cohesion, like an NGO Program Manager or a Cybersecurity Consultant working with diverse clients.

Development tip: Actively expand your professional network by attending industry events and connecting with mentors in the technology sector.

06

Work Style & Resilience

Resilience Scores

Long-Term Focus		100
Workplace Resilience		0

Work Style Preferences

Work Pace (Steady → Fast-paced)		100
Environment (Large Org → Startup)		0
Sector (Public → Private)		0
Mobility (Local → International)		100

Your high long-term focus (100/100) indicates you are exceptionally persistent and committed to achieving future goals, a powerful asset for any career. However, your low workplace resilience (0/100) suggests you may find navigating daily workplace pressures and setbacks particularly challenging, making it important to proactively build coping mechanisms and support systems. You thrive in a fast-paced (100/100) yet structured environment within a large organization (0/100) in the public sector (0/100), where you can apply your skills on an international scale (100/100). This unique blend suggests you seek impactful roles within well-established global entities, offering both dynamism and security.

07

Entrepreneurial Profile

Entrepreneurship Scores

Prior Experience		0
Risk Tolerance		0
Portfolio Interest		0

Your current profile shows low prior experience (0/100), low risk tolerance (0/100), and low portfolio interest (0/100) in entrepreneurship, indicating a preference for more established career paths right now. While your Enterprising RIASEC score suggests leadership potential, exploring entrepreneurship like Tech Entrepreneur or Startup Founder might be best considered after gaining foundational industry experience and building a stronger risk appetite.

08

Career Pathways

IT Project Manager

95%

MATCH

Technology Strong fit Builds on your background

Your exceptional scores in Investigative (100), Enterprising (100), and Conventional (100) RIASEC traits, combined with your Strategic (100) and Leadership (100) strengths, make you ideally suited to lead complex technology initiatives. You thrive in structured environments, aligning with your preference for large organizations, ensuring your strong organizational skills drive projects to successful completion while satisfying your need for Security (100).

This role offers robust growth within the thriving Saudi technology sector, leading to senior program management or even executive roles as KSA prioritizes digital transformation and large-scale IT infrastructure development.

Cybersecurity Consultant

94%

MATCH

Technology Strong fit Builds on your background

With your perfect Investigative (100) and Conventional (100) scores, coupled with your Strategic (100) thinking, you possess an innate ability to diagnose complex security vulnerabilities and design robust, structured solutions. Your high Openness (100) will enable you to adapt to evolving cyber threats, making you a vital asset in protecting critical digital infrastructure, a key area of focus within Saudi Arabia's National Strategy for Data & AI (NSDAI).

The demand for cybersecurity expertise in Saudi Arabia is rapidly increasing across both public and private sectors, offering a clear pathway to specialized leadership roles and potentially global consulting opportunities given your international mobility (100).

Product Manager

93%

MATCH

Technology Strong fit Builds on your background

This role beautifully combines your Investigative (100) drive to understand market needs with your Enterprising (100) spirit to bring innovative tech products to life, all supported by your Strategic (100) and Leadership (100) strengths. Your high Agreeableness (100) and Relationships (100) strength will be crucial in uniting diverse teams to deliver impactful technology solutions, perfectly aligning with your desire for Impact (100).

As Saudi Arabia's digital economy expands, particularly with the push for local innovation, a Product Manager can advance to Head of Product or CTO positions, shaping the future of technology within established companies.

Cybersecurity Analyst

92%

MATCH

Technology Strong fit Builds on your background

Your exceptional Investigative (100) and Conventional (100) skills are perfectly aligned for dissecting data, identifying patterns, and implementing precise security protocols, providing the foundational technical expertise crucial for protecting digital assets. This role allows you to make a tangible Impact (100) in a critical field, offering a structured environment that aligns with your preference for large organizations and providing a strong sense of Security (100).

Starting as an Analyst offers a clear career ladder to more senior specialist or even consultant roles within the rapidly expanding cybersecurity domain in Saudi Arabia, building a robust skill set highly valued by employers.

NGO Program Manager

88%
MATCH

Social Services Worth exploring New direction

Your strong Social (88) and Enterprising (100) traits, combined with your Leadership (100) and Relationships (100) strengths, would empower you to effectively design, oversee, and drive programs that address pressing societal needs. This path offers immense potential to fulfill your Core Value of Impact (100), leveraging your strategic abilities to create meaningful change within a purpose-driven organization.

As Saudi Arabia's non-profit sector grows and diversifies, this role could lead to leadership positions within large NGOs, or even influence policy at a national level, aligning with your desire for international mobility and broader impact.

Venture Capitalist

87%
MATCH

Finance Worth exploring New direction

Your exceptional Investigative (100) ability to scrutinize opportunities, coupled with your Enterprising (100) drive to identify and support promising ventures, makes you well-suited to evaluating and investing in the next generation of Saudi startups. You can leverage your Strategic (100) and Leadership (100) strengths to guide nascent companies, fulfilling your desire for Impact (100) by fostering economic growth. While this role can involve financial risk for others, your preference for a fast-paced (100) environment and high Openness (100) would be significant assets in this dynamic field.

The KSA's ambitious goals for nurturing 300 AI startups by 2030 present an extraordinary growth trajectory for venture capitalists, leading to partner roles and significant influence in the burgeoning innovation ecosystem.

Tech Entrepreneur

85%
MATCH

Technology Worth exploring Builds on your background

Your stellar combination of Investigative (100), Enterprising (100), Strategic (100), and Leadership (100) strengths provides an ideal foundation for conceiving and scaling innovative technology ventures, directly aligning with your high Openness (100) and desire for Impact (100). While your low risk tolerance (0) and high need for Security (100) present a significant challenge, gaining experience within the structured tech industry first could prepare you to eventually pursue this path, potentially within KSA's growing startup ecosystem.

Saudi Arabia's NSDAI and focus on developing 300 AI startups offers a fertile ground for tech entrepreneurship, promising immense potential for wealth creation and societal contribution once initial startup risks are mitigated or managed with strong support.

Startup Founder

84%
MATCH

Business Worth exploring New direction

Your unique blend of Enterprising (100) vision, Strategic (100) planning, and Relationship-building (100) strengths makes you a natural leader for building a new venture from the ground up, allowing you profound Freedom (100) and the ability to make a direct Impact (100). However, your preference for Security (100) and low risk tolerance (0) indicate that success in this inherently high-risk environment would require careful preparation, potentially seeking co-founders or utilizing incubation programs to mitigate early-stage uncertainties, especially in KSA's supportive yet demanding startup scene.

Founding a successful startup in Saudi Arabia, particularly within its priority digital and AI sectors, offers unparalleled growth, leading to significant personal and professional fulfillment as you contribute to the nation's economic diversification.

09

AI Impact & Future-Proofing

Given your strengths in strategic thinking, leadership, and relationships, combined with an investigative and enterprising nature, you are exceptionally well-suited to thrive in an AI-driven future. Your top career matches position you to leverage AI as a powerful tool for innovation and growth, rather than being at high risk of displacement. The GCC region's rapid digital transformation further amplifies the demand for professionals with your unique blend of skills.

IT Project Manager (Technology)

MEDIUM RISK

AI adoption in IT project management is accelerating in the GCC, driven by national digital transformation agendas and large-scale infrastructure projects demanding efficient, data-driven execution.

HUMAN SKILLS THAT STAY VALUABLE

Strategic stakeholder negotiation and communication

Complex problem-solving and adaptable decision-making

Empathetic leadership and team motivation

HOW TO PREPARE

Mastering AI-powered project management platforms and tools (e.g., Jira with AI plugins)

Obtaining certifications in Agile/Scrum methodologies with a focus on AI integration

What this means for you: Your strategic vision and ability to lead teams through complex projects will be highly valued. Focus on understanding how AI tools can enhance your oversight and decision-making, making you an even more effective leader rather than automating your core responsibilities.

Cybersecurity Consultant (Technology)

LOW RISK

The demand for cybersecurity expertise in the GCC, especially Saudi Arabia, is skyrocketing due to increased digital transformation and national security priorities, with AI being a crucial tool and target.

HUMAN SKILLS THAT STAY VALUABLE

Strategic threat intelligence and risk architecture design

Leading complex incident response and recovery efforts

Ethical decision-making and communication of complex risks to leadership

HOW TO PREPARE

Specializing in AI/ML security, including securing AI systems and using AI for advanced threat hunting

Pursuing advanced certifications like CISSP or CISM with an emphasis on cloud and AI security

What this means for you: Your investigative nature and strategic thinking are perfect for this field. While AI will handle much of the day-to-day threat detection, your ability to design resilient systems and lead responses to novel threats will secure your position as an indispensable expert.

Tech Entrepreneur (Technology)

LOW RISK

Saudi Arabia is vigorously fostering a dynamic tech startup ecosystem through significant investments and initiatives, actively seeking AI-driven solutions that address local and regional challenges.

HUMAN SKILLS THAT STAY VALUABLE

Visionary leadership and identifying unique market needs

Building and motivating high-performing, diverse teams

Investor relations, negotiation, and adapting business models creatively

HOW TO PREPARE

Actively studying the venture capital landscape and startup ecosystems within the GCC

Developing strong product development skills with an emphasis on ethical AI design principles and integration

What this means for you: Your enterprising spirit and desire to create impact are perfectly aligned with being a Tech Entrepreneur. Focus on identifying unique problems within the GCC context that AI can innovatively solve, and cultivate your leadership and networking skills to build and scale ventures.

Product Manager (Technology)

MEDIUM RISK

The demand for skilled product managers is rapidly expanding in the GCC as companies prioritize building innovative, locally relevant products and services, with AI becoming an essential component.

HUMAN SKILLS THAT STAY VALUABLE

Defining product vision, strategy, and roadmap

Deep understanding of complex user needs and empathetic problem-solving

Cross-functional team leadership and strategic stakeholder management

HOW TO PREPARE

Gaining expertise in AI ethics, responsible AI development, and explainable AI (XAI)

Developing advanced skills in user experience (UX) research and design, especially for AI-powered interfaces

What this means for you: Your strategic mindset and ability to build strong relationships will be critical in guiding the development of successful products. Concentrate on deeply understanding user problems and how ethical AI solutions can deliver genuine value, ensuring your products resonate culturally and technologically.

Startup Founder (Business)

LOW RISK

Saudi Arabia is investing significantly in its startup ecosystem as part of Vision 2030, actively encouraging local innovation and entrepreneurship across diverse sectors, particularly those leveraging advanced technologies like AI.

HUMAN SKILLS THAT STAY VALUABLE

Visionary leadership and building a compelling company culture

Strategic decision-making, investor relations, and capital raising

Navigating regulatory landscapes and adapting business models dynamically

HOW TO PREPARE

Networking extensively within the GCC's entrepreneurship and investment ecosystem

Gaining practical experience in lean startup methodologies and design thinking, with an emphasis on AI-driven innovation

What this means for you: Your drive for freedom and impact makes you an ideal candidate for founding a startup. Develop a keen eye for unmet market needs within the GCC and cultivate strong leadership and networking abilities to transform your innovative ideas into successful, impactful ventures.

10

Majors & Exposure

As a high school student, consider pursuing majors such as Computer Science, Information Technology, or Business Administration with a focus on Entrepreneurship. These fields will provide the foundational technical skills for cybersecurity and IT project management, alongside the business acumen crucial for success as a tech entrepreneur or product manager.

Participate in a Saudi National Hackathon

This directly applies problem-solving, strategic thinking, and teamwork essential for tech entrepreneurship, product development, and cybersecurity challenges.

Join a University Tech/Entrepreneurship Club

It offers a platform to develop leadership and relationship skills while exploring tech projects and startup concepts with peers, aligning with enterprising and strategic strengths.

Volunteer at a Local Tech Startup or Incubator

This provides firsthand insight into the daily operations, challenges, and project lifecycle within a real tech business environment, fostering understanding for future roles like project or product manager.

Build a Simple App or Website as a Personal Project

Developing a personal tech project enhances foundational technical skills and provides practical experience in product creation and management, beneficial for aspiring entrepreneurs and product managers.

Recommended Courses

Google Data Analytics Certificate

Coursera (Google) · beginner

End-to-end data analytics with SQL, R, and Tableau.

AI For Everyone

Coursera (DeepLearning.AI) · beginner

Non-technical overview of AI strategy, capabilities, and ethics.

Power BI Data Analyst

Microsoft Learn · intermediate

Build dashboards and reports using Microsoft Power BI.

Communication Skills for Engineers

Coursera (Duke) · beginner

Technical communication, presentations, and writing for professionals.

Business Analytics

Coursera (Wharton) · intermediate

Apply data analysis to real business decisions using Excel and Tableau.

Project Management Professional (PMP) Prep

Coursera (Google) · beginner

Covers project lifecycle, Agile, and Scrum with Google methodology.

MBA Core Concepts

edX (various) · intermediate

Core MBA topics: strategy, finance, marketing, and leadership.

Excel Skills for Business

Coursera (Macquarie) · beginner

Advanced Excel for financial analysis and reporting.

13

Your 90-Day Action Plan

1 Month 1 — Launch

Research university programs in Computer Science, Information Technology, or Business Analytics to align with roles like Cybersecurity Analyst or Product Manager.

Explore online courses (e.g., Coursera, edX) in Python, data analysis, or project management fundamentals, relevant for IT Project Manager or Cybersecurity Analyst roles.

Attend virtual career fairs or webinars focused on the technology sector to learn more about careers like Cybersecurity Consultant and Product Manager.

2 Months 2–3 — Build

Select and apply to university programs that offer specializations relevant to IT Project Management, Cybersecurity, or Product Development.

Begin working on a personal tech project (e.g., a simple app, a website, or a data analysis project) to demonstrate initiative and learn practical skills, beneficial for aspiring Tech Entrepreneurs.

Seek out entry-level certifications like CompTIA A+ or Google IT Support Professional Certificate, which can be foundational for a Cybersecurity Analyst or IT Project Manager.

3 Months 4–6 — Grow

Enroll in relevant university courses, focusing on core technology subjects and business principles important for roles like Product Manager or Venture Capitalist.

Look for volunteer opportunities or part-time roles that involve project coordination or data organization, to gain practical experience useful for IT Project Manager or NGO Program Manager.

Network with professionals in the technology sector, particularly those in cybersecurity, product management, or venture capital, to gain insights into their career paths and potential internship opportunities.

Your Journey Starts Here

Sara, your journey is just beginning, and your unique blend of strategic insight, leadership drive, and analytical depth positions you for remarkable success. By intentionally pursuing opportunities that allow you to innovate, lead, and make a tangible impact, you will undoubtedly build a career that is both secure and fulfilling. Embrace your curiosity and your drive to make a difference, and know that you are exceptionally well-equipped to shape the future of technology.
